

Ideation Phase

Brainstorm & Idea Prioritization Template

Project name: FitBuddy

Brainstorm & Idea Prioritization Template:

FitBuddy is an AI-powered fitness planning application designed to provide personalized workout guidance based on the user's age, weight, fitness goal and workout intensity. The idea focuses on using Generative AI to create a customized 7-day workout plan, provide nutrition and recovery tips, and improve the plan based on user feedback. The project uses Google Gemini AI with a web-based application.

Step-1: Team Gathering, Collaboration and Select the Problem Statement

Project Idea

FitBuddy is an AI-powered fitness planning application designed to provide personalized workout guidance based on the user's **age, weight, fitness goal, and workout intensity**.

The application uses **Google Gemini AI** to generate a customized **7-day workout plan**, along with **nutrition and recovery tips**. Users can also provide feedback, allowing the system to improve and update their workout plan according to their needs.

Problem Statement

People often need personalized fitness guidance based on their individual goals and fitness levels. Existing general workout guidance may not be customized to each user's requirements.

Therefore, **FitBuddy** aims to provide an AI-based solution that generates a personalized **7-day workout plan**, along with **nutrition and recovery tips**, based on user inputs such as **age, weight, fitness goal, and workout intensity**.

Step-2: Brainstorm, Idea Listing and Grouping

Group	Brainstormed idea
Personalized Fitness	Generate customized workout plans based on user details
AI Assistance	Use Google Gemini AI for fitness plan generation
Nutrition	Provide personalized nutrition and recovery tips
User Feedback	Modify and improve the workout plan based on user feedback
Data Management	Store user details and workout plans using SQLite
Administration	Provide a view for administrators/coaches to see users and workout plans

Step-3: Idea Prioritization

Idea	Priority
Personalized 7-day workout plan	1
Feedback based workout plan update	2
Nutrition and recovery tips	3
User and workout plan data storage	4
Admin/coach view	5

The prioritization focuses first on the core functionality of FitBuddy: generating a **personalized 7-day workout plan**. Feedback-based improvement and health-related guidance are then included, followed by data management and administrative features.
