

Project Name : FitBuddy

Customer Journey Map

Phases / Steps	1. Entice (Discovery)	2. Enter (Onboarding)	3. Engage (Core Usage)	4. Exit (Goal Achievement)	5. Extend (Retention)
Steps & Experience	Hears about FitBuddy from friends or online health communities; decides to download or open the app.	Signs up using email or Gmail, enters age, weight, height, and fitness goals (e.g., weight loss).	Logs daily workouts, views automated BMI calculations, and follows personalized meal suggestions.	Completes weekly fitness targets, checks calorie burn logs, and reviews performance graphs.	Receives automated weekly progress summaries, achievement badges, and updated workout routines.
Interactions (Touchpoints, Places, People)	Touchpoints: Social media, App Store landing page. Place: Home / College campus. People: Peer recommendations.	Touchpoints: FitBuddy Auth Screen, Profile setup form. Place: Mobile / Web browser. People: Self-guided onboarding.	Touchpoints: Dashboard, BMI Calculator, Workout Tracker, Meal Planner. Place: Gym, home, or outdoor space.	Touchpoints: Progress Analytics, Goal Completion Screen. Place: Daily reflection at home.	Touchpoints: Push notifications, weekly summary emails. Place: Anywhere on mobile.
Goals & Motivations	"Help me find an affordable, personalized fitness app that guides my daily routine."	"Help me quickly set up my profile without asking for unnecessary or complicated details."	"Help me track my daily calories and workouts easily without spending too much time."	"Help me see clear visual progress and know if I am achieving my health goals."	"Help me stay motivated over time with new exercise challenges and tailored diet tips."
Positive Moments (Delightful)	Clean landing page showcasing zero subscription cost and smart AI tracking.	Fast setup with instant auto-calculation of BMI and initial calorie targets.	Interactive workout guides and easy meal logging with immediate feedback.	Clear chart visualizations showing steady calorie burn and weight milestones.	Receiving encouraging badges and fresh monthly workout plan updates.
Negative Moments (Frustrations)	Unsure if the app caters to specific dietary habits or beginner exercise levels.	Slight friction if required health metrics aren't readily known by the user.	Manual food logging can feel tedious if food item search isn't fast enough.	Feeling disappointed if progress stalls or if charts look too complex.	Notification fatigue if reminder alerts are sent too frequently.
Areas of Opportunity	Provide instant feature preview or demo mode on the landing page.	Add preset averages for height/weight to speed up initial onboarding.	Implement quick quick-log buttons for popular meals and workouts.	Add celebratory animations and streak counters to boost motivation.	Allow customized notification frequencies and goal adjustments.
