

Ideation Phase

Empathize & Discover

Project Name : FitBuddy

Empathy :

The empathy stage focuses on understanding the difficulties faced by people who want to follow a fitness routine but need guidance that matches their individual requirements.

User Needs

- Personalized workout guidance
- Customized 7-day workout plan
- Nutrition and recovery guidance
- Suitable workout intensity
- Ability to give feedback and improve the workout Says plan
- Simple access to fitness guidance through a web application

Empathy Map - FitBuddy :

Map Canvas	FitBuddy Example
Says	"I need a workout plan that suits my fitness goal."
Thinks	"Which exercises and workout intensity are suitable for me?"
Does	Searches for workout guidance and try to follow fitness routines.
Feels	Feels confused about choosing a suitable workout plan and needs personalized guidance.
Pains	General workout plans may not match individual requirements. It can also be difficult to maintain a structured routine.
Gains	Wants a personalized 7-day workout plan with nutrition and recovery guidance that can be improved through feedback.

Key Discovery :

FitBuddy addresses the gap between generic fitness plans and individual user requirements by using Gemini AI to generate personalized workout guidance based on user inputs and feedback.
