

Project Planning Phase

Project Planning (Product Backlog, Sprint Planning, Stories, Story points)

Project Name : FitBuddy

Product Backlog, Sprint Schedule, and Estimation

Sprint	Functional Requirement (Epic)	User Story Number	User Story / Task	Story Points	Priority
Sprint-1	User Authentication & Profile	USN-1	As a user, I can register for FitBuddy using my email, password, and personal health goals.	2	High
Sprint-1	User Authentication & Profile	USN-2	As a user, I receive a confirmation email once registered successfully on FitBuddy.	1	High
Sprint-1	User Authentication & Profile	USN-3	As a user, I can log into FitBuddy using Google OAuth (Gmail).	2	Medium
Sprint-1	BMI & Calorie Engine	USN-4	As a user, I can enter my age, height, and weight to calculate my BMI and daily calorie limit.	3	High
Sprint-1	BMI & Calorie Engine	USN-5	As a user, I can log into FitBuddy with my existing credentials.	1	High
Sprint-2	Workout Planner	USN-6	As a user, I can view customized daily exercise routines based on my fitness goals.	3	High
Sprint-2	Diet & Nutrition Module	USN-7	As a user, I can receive personalized meal plans to meet my targeted calorie intake.	3	Medium
Sprint-2	Dashboard & Progress	USN-8	As a user, I can view my daily step count and burned calorie progress on an interactive dashboard.	5	High

Project Tracker, Velocity & Burndown Chart

Sprint	Total Story Points	Duration	Sprint Start Date	Sprint End Date (Planned)	Story Points Completed	Sprint Release Date (Actual)
Sprint-1	9	6 Days	01 Mar 2026	06 Mar 2026	9	06 Mar 2026
Sprint-2	11	6 Days	08 Mar 2026	13 Mar 2026	11	13 Mar 2026
Sprint-3	10	6 Days	15 Mar 2026	20 Mar 2026	10	20 Mar 2026
Sprint-4	10	6 Days	22 Mar 2026	27 Mar 2026	10	27 Mar 2026

Velocity & Calculations

Imagine we have a 10-day sprint duration, and the velocity of the team is 20 (points per sprint). Let's calculate the team's average velocity (AV) per iteration unit (story points per day):

$$AV = (velocity) / (sprint\ duration) = 20 / 10 = 2\ points\ per\ day$$

Burndown Chart Overview

A burndown chart is a graphical representation of work left to do versus time. It is often used in agile software development methodologies such as Scrum to track project progress over time.

Example:
